The 5th Annual
LION Winter Global Videoconference Broadcast

The 5th LION Winter Videoconference will focus on "Ossiculoplasty: How we do it". Various indications, approach, materials and surgical techniques in ossicular chain reconstruction including middle ear implants will be discussed via the LION network by combining case presentation, live surgery, instruction courses and panel discussion. The moderating team located in Utrecht will facilitate active discussion to encourage international exchange of knowledge and ideas in this field. You can follow the event via the LION website and interact with the surgeons and moderators by e-mail or chat room. Further information and a final program will be available online. We look forward to your participation in this Global event of Quality Continuing Medical Education through videoconferencing technology.
